

International Moth Class Association

Rules Working Group

Notice #1
20th Feb, 2011

Following the 2011 AGM, a rules working group has been set up to work with IMCA Chief Measurer Adam May on a tidy up of the current International Moth Class Rules, and consider possible rule versions with regard to the use of wing sails.

IMCA members are invited to comment on any rules topics that they believe should be considered in this review process. Whether it is an idea on the wording of a specific rule, or just the correction of a spelling mistake or punctuation, any construction input is welcomed.

These comments should be directed to:
Measurement@moth-sailing.org

We may not be able to respond back to each individual comment, but they will all be taken into account.

Further notices will be published as we go through this process. Members of the group and the timescale will be clarified shortly, and eventually draft rules posted here for comment.

Adam May
IMCA Chief Measurer
